SUMMARY

Third-year Computer Science Engineering student at VIT Bhopal. Strong foundation in Data Structures & Algorithms, Java backend development, and OOP. Proven ability to build full-stack applications and keen interest in problem-solving. Certified in AWS Cloud and Google IT Support. Result-driven mindset with focus on delivering measurable impact.

TECHNICAL SKILLS

Programming: Java, Python, C++, SQL, JavaScript (ES6+), HTML, CSS

Problem Solving & DSA: Data Structures, Algorithms, Object-Oriented Programming (OOP), LeetCode (100+ problems solved)

Machine Learning: CNN (MobileNetV2), TensorFlow, Scikit-learn, NLP, Data Preprocessing

Backend & Cloud: AWS (EC2, S3, IAM, VPC), REST APIs, FastAPI, MySQL (complex queries, joins, aggregations)

Frontend & Tools: ReactJS (Hooks, State Management), Git, GitHub, Agile

EDUCATION

VIT Bhopal University

B.Tech in Computer Science and Engineering; CGPA: 7.93

Hill Grove Col's Academy (CBSE)

Class X : 89.6%; Class XII: 84.4%

Bhopal, India

2023 – 2027 (expected)

Rajasthan, India

2020 – 2022

FEATURED PROJECTS

AI-Based Skin Disease Detection System

Full Stack AI Healthcare Application

[View Project](#)

Python, FastAPI, ReactJS

- Developed a multi-modal CNN system using MobileNetV2 achieving 85% validation accuracy on dermatological images.
- Architected a FastAPI backend with real-time image preprocessing and inference (latency < 200ms per request).
- Designed responsive ReactJS frontend for seamless uploads and diagnosis display; implemented REST API integration.

Highway Draft Power Generator

MERN Stack Real-Time Monitoring

[View Project](#)

Node.js, Express, MongoDB, Socket.io

- **Backend & Database:** Designed and implemented entire backend using Node.js/Express; created MongoDB schemas with Mongoose for sensor readings, admin notes, and user feedback.
- **REST APIs:** Built secure JWT-authenticated REST endpoints for CSV data import, sensor statistics (average/max/total Wh), and admin feedback management.
- **Data Streaming:** Engineered real-time WebSocket (Socket.io) data pipeline simulating RP2040/ESP8266 output, pushing live voltage/wattage data every 10 seconds to the frontend.
- Collaborated on frontend integration and AI-powered summarisation (Claude API) for automated trend insights.

Chemical Equipment Parameter Visualizer

Dual-Platform Data Analysis System

[View Project](#)

Pandas, DRF, PyQt5, JavaScript

- Developed a full-stack web dashboard and a desktop application sharing a single REST API backend for CSV data analysis.
- Built a web frontend with Chart.js for interactive visualizations and a PyQt5/Matplotlib desktop client for offline analysis.
- Engineered backend logic with Pandas to compute equipment parameter statistics and generate downloadable PDF reports.

INDUSTRIAL EXPOSURE

Experiential Learning Program (VIT Bhopal)

Industry Visit & Technical Workshops

Bangalore & Chennai

Nov 2024

- * Observed High Performance Computing (HPC) and Quantum Computing setups at **C-DAC Bangalore**.
- * Participated in an **Embedded Systems** workshop and visited **BSNL Training Centre**.
- * Analyzed large-scale industrial infrastructure at the **North Chennai Thermal Power Plant**.

PROFESSIONAL CERTIFICATIONS

AWS Cloud – AWS SimuLearn: Cloud Computing Essentials & AWS Technical Essentials

(Credly Badges)

Google IT Support Professional Certificate – Coursera

(Verify)
